Q2 2021 survey methodology and background

Methodology

This wave of the survey was conducted from April 1 to April 12 of 2021, among an online US sample of 957 self-directed active investors who manage at least \$10,000 in an online brokerage account. The survey has a margin of error of ± 3.20 percent at the 95 percent confidence level. It was fielded and administered by Dynata. The panel is broken into thirds of active (trade more than once a week), swing (trade less than once a week but more than once a month), and passive (trade less than once a month). The panel is 63% male and 37% female, with an even distribution across online brokerages, geographic regions, and age bands.

This study looks into the minds and behaviors of self-identified experienced investors

- They self-select as having moderate to professional investing experience
- They take charge of their investments
- They believe they understand the markets, investment products, and asset classes

Q2 2021 survey timing mapped against major market indexes

S&P 500®/DJIA

SENTIMENT

VIEWS ON THE MARKET AND WHERE
OPPORTUNITIES LIE

Views on the market

Bullishness increased

When it comes to the current market, are you...?

“Easy Rider” ticked up this quarter

If you had to pick a movie title that best describes how you personally feel about the market this quarter, which would it be?

Most believe the market will rise this quarter

Where do you predict the market will end this quarter?

Views on the economy and rates

Most would grade the Fed a B or C again

What grade would you give the Fed for how it is handling the economic recovery?

More investors graded the economy an A or B this quarter

What grade would you give the current state of the US economy?

Inflation, interest rates, and market volatility concerns ticked up

What risks are you actively managing right now when it comes to your portfolio?

Asset class interest

Interest in individual stocks remains high

If you could give one piece of advice to a friend or family member who is thinking of investing right now, would it be to get into...
Select your top four.¹ (Top 10 shown.)

Large caps remain in favor

How interested/comfortable are you with investing in each of the following sectors this quarter?¹ (% Very/extremely interested; base=all)

1. Focuses on y/y and q/q—other quarters available upon request

US sector interest

Interest in health care dropped significantly this quarter

What industries do you think offer the most potential this quarter? Select your top three.¹ (Top 10 shown.)

International and emerging market interest

Investors generally are not making changes to EM exposure

Thinking about your investment approach specific to emerging markets, which of the following adjustments do you plan to make over the next quarter?

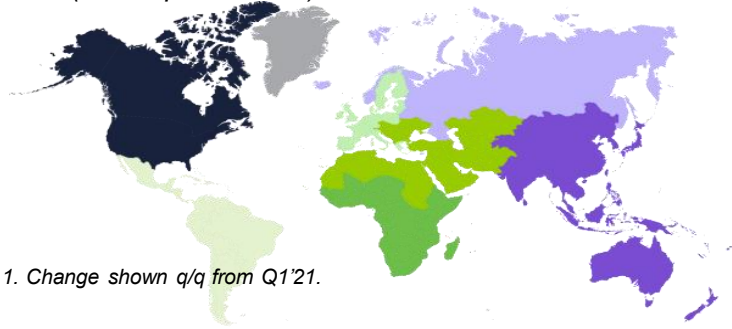

Interest in markets outside the US increased

The health of the markets outside the US appeals to me as an investor. (% = Strongly/somewhat)

Interest in the US and Canada increased, while interest in Asia and the EU ticked down

Which regions do you think offer the greatest investment potential this quarter?¹ (% = Top two boxes)

Region	% Interested	Q/Q Δ
United States and Canada	76%	+6%

Past performance is no guarantee of future returns. The performance of an index is not an exact representation of any particular investment, as you cannot invest directly in an index.

Dow Jones Industrial Average: Computed by summing the prices of the stocks of 30 companies and then dividing that total by an adjusted value—one which has been adjusted over the years to account for the effects of stock splits on the prices of the 30 companies. Dividends are reinvested to reflect the actual performance of the underlying securities.

S&P 500® Index is a market capitalization-weighted index of 500 widely held stocks often used as a proxy for the US stock market.

All components of the S&P 500 are assigned to at least one of eleven S&P Select Sector Indexes, which track major economic segments and are highly liquid benchmarks. Stock classifications are based on the Global Industry Classification Standard. The Select Sector Indexes are: Communication Services Select Sector, Consumer Discretionary Select Sector; Consumer Staples Select Sector; Energy Select Sector; Financials Select Sector; Health Care Select Sector; Industrials Select Sector; Materials Select Sector, Real Estate Select Sector, Technology Select Sector; and Utilities Select Sector.

VIX® is the ticker symbol for Cboe Volatility Index®. The index, also called the fear index, is calculated by Cboe and generally measures expected volatility of the US market in the next 30 days. The higher the number, the more bearish the market is in general. The VIX is used to calculate the put/call ratio.
